WHAT IS A SCHUMANN WAVE?

Schumann waves are natural electromagnetic frequencies produced by lightning activity in the Earth-ionosphere cavity.

The fundamental frequency is 7.83 Hz, with harmonics at 14.3, 20.8, 27.3 and 33.8 Hz.

WHY DOES IT MATTER?

These frequencies are believed to play a key role in supporting human health by promoting cellular balance, reducing stress, and enhancing sleep, mood, and overall well-being.

POTENTIAL BENEFITS

- ✓ Promotes deep relaxation and better sleep
