| Use             | External use on targeted acupoints |

### How the Controls Work

**Intensity Control:** Use the + and - controls to adjust the intensity through the available levels. The selected level is shown on the digital display.

**Power:** Long press the power control to turn the device on or off.

**Treatment Heads:** The replaceable head system allows compatible heads to be changed according to the intended application.

## Package Contents

Electronic Acupuncture Pen, interchangeable treatment heads, and product instructions. **AA batteries are not included.**
